

FACILITIES DEVELOPMENT

usaswimming.org

USA Facilities Department – Professional Providers

USA Swimming Facilities Development Department has developed in-house resources to assist our clubs in their quest for Aquatic Business success. This encompasses pool and facility construction, operation, and programming. Our department has a finite scope of what we can supply and offer, so we have partnered with proven professionals in the aquatics industry. These **“Professional Providers”** have offered to extend either preferred pricing and/or service to our USA Swim Clubs and their affiliates and partners. This assists our clubs in building and operating more effective and efficient facilities, and more successful profitable businesses.

The current levels of assistance that have been identified are:

- Design, Engineering, and Consulting Firms
- Building and Construction representatives
- Product Manufacturers
- Service suppliers
- Distributors

Our department has identified firms/companies we think would be valuable associates in respect to what they can offer our clubs and have designated them as ‘Professional Providers’. We are continually searching for competent firms with a proven track record to increase the options for our clubs. .

USA Swimming receives no sponsorship money from our providers unless they are specifically designated as a sponsor. Cost Savings are passed on directly to our membership. The companies that make up our providers list must meet our department’s expectations for exemplary service, knowledge and quality of workmanship, and attend a USA Swimming Build a Pool conference at least once every 4 years. These providers are capable of coordinating all activities with our department and support solution oriented innovation in the aquatics field.
