

## POOL MEASUREMENT CERTIFICATION

### POOL MEASUREMENT CERTIFICATION OF PERMANENT RACING COURSE

For a swimming record to be recognized, the racing course must be certified.

- If the course has a movable bulkhead, the measurements must be taken immediately after the competition (before any lane lines or touchpads are adjusted) and certified by a Registered Surveyor or Registered Engineer. A copy of the USA Swimming [official certification form](#) must be filled out completely and have the engineer's license number, stamp, and signature on the form. *Drawings, sketches, and separate sheets or attachments need not be included. We need the lane measurement on our form.* The completed documents need to be sent to USA Swimming's National Events Manager, Kelly Naze ([knaze@usaswimming.org](mailto:knaze@usaswimming.org)) along with any application for records. Sending them in an e-mail with a .pdf attachment is preferred.

Bulkhead pools will be included in the list below but will have a “B” in the column next to the pool listing. These pools must always have the “lane” the record was achieved in re-measured for a record verification.

- If the course has fixed walls (no bulkheads), the measurements can be taken immediately after the competition, or can have been taken prior to the competition, and certified by a Registered Surveyor or Registered Engineer as above. This is the purpose of the list below.

For measurement, the pool needs to be filled with water to operational level, and have all equipment (lane lines, touchpads, starting blocks installed) If USA Swimming already has a copy of the certification on file (see list of certified pools below). A copy of the certification does not have to be mailed with the application for record if the record was achieved in a fixed wall pool.

**IMPORTANT** - For a pool to be included in the list below, all lanes must meet the “minimum” lane length requirement of 25.02 yards/meters or 50.02 meters measured without touchpads. The pools can be measured with touchpads installed which makes the minimum length requirements 25.00 yards or meters and 50.00 meters. *Our rule book uses the term “tolerance” and this wording is copied from the FINA international rule which we must adhere to. It is really not a tolerance in the sense we are used to – it is a minimum measurement that can be accepted.* The proper box on our forms must be checked for measurements - with pads at one end or pads at both end or without pads. Pool depths also must be listed on the form and the minimum depth of every lane at the starting end of the pool (if dive starts are done from both ends then both ends must be listed) must be 4'0” minimum. Measurements should be submitted in a form matching the course – meters for meters and yards for yards. E-mail all forms to [knaze@usaswimming.org](mailto:knaze@usaswimming.org). Please do not use first class or registered mail.

Note – pools measured without touchpads that measure 25.19 yards/meters (or shorter) or 50.19 meters or shorter will not be listed without the following notation *This pool course was measured without touchpads installed and all lanes are 25.00 yards or longer. It is certified for competitions with no touchpads. If touchpads*

*are used and a national record is broken, the pool must be re-measured with the pads in place and a new certification form submitted and approved before the record can be accepted.* If one lane is short, the pool will not be listed (certifications done after 2004). It may be best to measure the pool with touchpads installed since many pools were built shorter than 25.02 yards/meters but still measure 25.00 with pads.

Having racing courses be accurate and consistent is a goal of all competitors, officials, coaches, and swimming enthusiast. It is not fair to the swimmer to swim their best time once (in a “short pool”) and then wonder why the feat is so hard to achieve again. It should be standard practice when a pool is built and commissioned that the length, width, and depth are checked and certified to be in compliance with USA Swimming rules. \* Note – If a pool listing has and (\*) asterisk beside it, please e-mail [knaze@usaswimming.org](mailto:knaze@usaswimming.org) for more information about the listing.

Each facility or club has the responsibility to keep the original copy of certification in their own files. USA Swimming does not forward or send-out copies of the forms to other organizations. These must be requested from the facility. Our listing does not include individual lane lengths or pool depths. If individual lane length or pool depth confirmation is required for LSC sanctioning then it is the responsibility of the facility to supply that information to the sanctioning entity. A copy of the completed certified forms can be sent via e-mail to [knaze@usaswimming.org](mailto:knaze@usaswimming.org) and the pool will be listed if it complies with USA swimming rules.

**Please note that we do not send or e-mail copies of the actual forms to LSC’s or other swim organizations who request them. This is why we created this list. If you need to see a copy of the actual form you will have to request it from the facility. We do not do phone calls about pool certifications. All correspondence must be by email so we have a written record of what was said.**

|                | Oakfield Pool – St. Johns Island<br>4 lanes 25 meters Short Course <i>This pool course was measured without touchpads installed and all lanes are 25.00 meters. It is certified for competitions with no touchpads. If touchpads are used, the pool would be too short for a sanctioned meet.</i>  |    |                       | 03/21/2019 |

**ARTICLE 103**

**FACILITIES STANDARDS**

**103.1 DEFINITIONS**

- .1 /M/ = Indicates mandatory requirement for all competition.
- .2 /NC/ = Except as noted otherwise, indicates mandatory requirement for USA Swimming Championships and International Competition.
- .3 /LSC/ = Predicated on facility availability, LSC’s may waive strict compliance with these requirements in sanctioning local competition.
- .4 Where dimensions are given, the dimension listed first shall govern and dimensions given in parenthesis are for reference only.

**103.2 WATER DEPTH —**

- .1 /NC/ 2 meters (6 feet 7 inches) deep throughout the course.
- .2. /M/ **Teaching Racing Starts** – Minimum water depth for teaching racing starts in any setting from any height starting blocks or the deck shall be 5 feet (1.53 meters) measured for a distance of 3 feet 31/2 inches (1.0 meter) to 16 feet 5 inches (5.0 meters) from the end wall.
- .3 /M// **Racing Starts** – Minimum water depth for racing starts during practice and competition shall be measured for a distance 3’ 31/2” (1.0 meter) to 16’5” (5.0 meters) from the end wall.  
Starting requirements and height of starting block shall be:  
A In pools with water depth less than 4’ (1.22 meter) at the starting end, the swimmer must start from within the water;  
B In pools with water depth 4’ (1.22 meter) or more at the starting end, starting platforms shall meet the height requirements of 103.12.1.

**Note:** Local, state and municipal statutes, ordinances, rules and regulations, may have depth limitations in conflict with this section. The LSC and all Member Clubs should check for this at all times.

**103.3 RACING COURSE DIMENSIONS —**

- .1 /M/ **Length.**
  - A Long Course: 50.00 meters (164 feet and 1/2 inch).
  - B Short Course: 25.00 yards or 25.00 meters (82 feet and 1/4 inch).
  - C Dimensional Tolerance: Against the required length, a tolerance of plus (+) 0.02 meters in a vertical plane extending 0.3 meters (12 inches) above and 0.8 meters (2 feet, 7 and 1/2 inches) below the surface of the water at all points of both end walls.
  - D When automatic officiating equipment touch pads are used at one or both ends, the course shall be of such length that ensures the required distance between the two touch pads or between either pad and the opposite end of the course.
  - E When the racing course is fixed by the use of movable bulkheads, such bulkheads shall be designed to resist lateral deflection due to tension exerted by the attachment of the lane dividers to ensure the required course distance in all lanes.
  - F See Article 104, Rules for Swimming Records, for course measurements certification requirements.
- .2 **Width.**
  - A /NC/ Eight lanes, minimum width of 2.5 meters (8 feet 21/ inches), from center line to center line of the lane dividers, with approximately 0.45 meters (1 foot 6 inches) of additional open water outside lanes 1 and 8. Program Operations may waive this requirement for National Championships.
  - B /M/ Minimum lane width for competitive swimming shall be 7 feet (2.13 meters). /LSC/

**103.4 /M/ RACING COURSE WALLS —**

- .1 **Permanent Course Walls** — Walls enclosing the racing course shall be parallel and vertical. The end walls shall be at a right angle to the water surface and shall be constructed of solid material with non-slip surface that extends no less than 0.8 meters (2 feet 7 and 1/2 inches) below the water surface.

**.2 Movable Bulkhead Course Walls** — If a continuous recessed hand grip is provided at or near the water surface in a movable bulkhead, the horizontal dimension of the recess perpendicular to the bulkhead should be not less than six inches (.15 meters) and designed in a manner to prevent the swimmer's fingers from contacting the back surface of the recess.

**103.5 /M/ POOL AND BULKHEAD MARKINGS —**

**.1 Pool bottom lane markers:** Minimum 10 inch (25 centimeter) wide lines of a dark contrasting color (preferably black) shall be provided in the middle of each racing lane on the bottom of the pool. The lines should be uninterrupted the length of the course and shall end with a distinctive cross line 1.0 meters (3 feet 4 inches) long and the same width as the bottom marker. The line, including the cross line, shall terminate 2.00 meters (6 feet 7 inches) from each end wall. /LSC/

**.2 End wall targets:** Flush, non-slip targets in a shape of a "T" or a cross and the same width as the lane bottom markers shall be provided in the center of each lane on each end wall of the course and shall extend at least 3 feet 4 inches (1.0 meters) below the level of the water surface. It is recommended that the top edge of the deck be of a contrasting color to provide a visual target above water at the end of the course. /LSC/.3

A The lanes shall be numbered from right to left as the swimmers stand facing the course.

B Lane numbers shall clearly identify the lanes to officials stationed on each side of the course.

**103.6 /M/ OVERFLOW RECIRCULATION SYSTEM** — The pool water recirculation and overflow system shall maintain water level in line with the overflow rim of the pool gutters without creating appreciable current or water turbulence and shall maintain smooth and calm water surface during competition. The pool recirculation system shall be turned off if, in the opinion of the Referee, the water movement interferes with the conduct of competition.

**103.7 WATER AND AIR TEMPERATURE —**

**.1 /M/** Water temperature between 78 and 80 degrees Fahrenheit shall be maintained for competition.

**.2** Air temperature within 8 feet above deck level in indoor facilities shall be not lower than 76 degrees Fahrenheit, with relative humidity maintained at about 60% and air velocity at about 25 feet per minute.

**103.8 /M/ LADDERS** — All ladders, steps or stairs within the racing course shall be recessed in the pool side walls or shall be removed during competition.

**103.9 OTHER DECK EQUIPMENT —**

**.1** Use of portable lifeguard chair stands and other deck fixtures is recommended and they should be removed from the competition area to allow free passage and unobstructed view for competitors and officials along all sides of the course.

**.2 /M/** 1 meter diving boards which overhang the racing course shall be hinged out of the way or removed during competition.

**103.10 /M/ LIGHTING —**

**.1** A minimum of one hundred (100) foot candle illumination level is required at the water surface over the entire course. Overhead light fixtures shall be located to avoid the casting of shadows by the pool walls over the racing course.

**.2 /NC/** At National Championships the same type and level of illumination that will be used for finals must be provided and maintained during the warmup period and preliminaries.

**103.11 /M/ NO SMOKING SIGNS** — No smoking indoors or outdoors shall be permitted in any area designated for swimmers and the facility shall be so posted.

**103.12 /M/ STARTING PLATFORMS —**

**.1 Height.**

**A Long course and short course meters:** The front edge of the starting platform shall be no less than 0.50 meters (1 foot 8 inches) nor more than 0.75 meters (2 feet 5 and ½ inches) above the surface of the water.

**B Short Course yards:** The front edge of the starting platform shall be not higher than 2 feet 6 inches (0.762 meters) above the surface of the water.

.2 The front edge of the starting platform shall be flush with the face of the end walls.

.3 The top surface of the starting platform shall be not less than 0.50 by 0.50 meters (1 foot 8 inches square) and shall slope not more than 10 degrees from the horizontal. The entire surface of the platform shall be faced with permanent non-slip material.

**103.12**

.4 Backstroke starting grips: Starting platforms shall be equipped with firm starting grips located between 0.3 meters (12 inches) and 0.6 meters (24 inches) above water surface. The front edge of the grips shall be parallel to and flush with the face of the end wall.

.5 Starting platforms shall be clearly marked with lane numbers visible to competitors and officials. (See 103.5.3)

.6 Starting platforms shall be anchored to the deck or bulkhead to remain stable at all times.

**103.13 /M/ FLOATING LANE DIVIDERS —**

.1 Floating lane dividers shall extend the full length of the course and shall be attached at each end wall with recessed anchors so located that the center line of the cable securing the dividers shall be on the surface of the water with the bottom half uniformly submerged for its entire length. They shall:

A Separate the racing lanes. /M/

B Be outside the outermost lanes being used. /LSC/

.2 Dividers shall consist of contiguous floats having a minimum diameter of 5 centimeters (2 inches) to a maximum diameter of 15 centimeters (6 inches). The color of the floats extending from the walls the distance of 5 meters for long course and 15 feet for short course shall be distinct from the rest of the floats. Distinctive colored floats, or markers extending around the full circumference of the floats, shall be placed at 15-meters (49' 21/2") from each end wall in both short course and long course pools. Additionally, in long course pools, a distinctive warning line or lane markers may be placed at a distance of 13 meters from each end wall. There shall be no exposed cables accessible to swimmers within the length of the racing course and the cable take-up spools and ratchet mechanisms shall be completely concealed with durable flexible covers. Damaged or broken floats shall be removed and replaced.

.3 A single line of dividers between racing lanes shall be used in long course and short course meters competition. Multiple lines may be installed for short course yards competition, provided the width of water between dividers is not reduced to less than 7 feet. /LSC/

.4 /NC/ Minimum 11 centimeter diameter floats shall be required for National Championships.

**103.14 /M/ BACKSTROKE FLAGS AND LINES —**

.1 **Design:** At least three triangular pennants six (6) to twelve (12) inches in width at the base and twelve (12) to eighteen (18) inches in vertical length, of two or more alternating and contrasting colors shall be suspended on a firmly stretched line over each lane during all warmup periods and during competition for all backstroke, individual medley and medley relay events.

**.2 Location:**

A Long course and short course meters: 5 meters (16 feet 5 inches) from each end of the course, a minimum of 1.8 meters (5 feet 11 inches) to a maximum of 2.5 meters (8 feet 3 inches) above the water surface.

B Short course yards: 15 feet (4.57 meters) from each end of the course, 7 feet (2.13 meters) above the water surface.

C Height shall be measured to the horizontal line from which the pennants are suspended.

**103.14**

.3 For long course backstroke, individual medley, and medley relay events a firmly stretched ¼ inch line without flags or pennants shall be suspended at midpoint of the course. /LSC/

**103.15 /NC/ LOUDSPEAKER START SYSTEM** — An electronic sound generating device shall be provided to give the starting and recall signal. Loudspeakers may be mounted underneath or on the side of each starting platform, between every two platforms, on each side of the racing course, or positioned behind the starting platforms in such a manner that equitable dispersion of sound to all lanes is assured. The device shall also activate a strobe light, or similar visual signal, located on the starter's side of the course approximately 15 feet forward from the starting end, to indicate the start to manual timers and deaf and hard-of-hearing swimmers. The start system may include an underwater recall speaker and gun lap signal option.

**103.16 /M/ RECALL DEVICE** — A device to recall swimmers shall be provided. If a recall rope is used, it shall be placed at the mid-point of the course in long course facilities and at the turn end backstroke flags in short course facilities.

**103.17 /LSC/ PACE CLOCKS** — There shall be at least two large accurate timing devices or clocks, preferably located one on each side of the course, clearly visible to all swimmers. Dial type clocks shall be at least 3 feet in diameter with a sweep second and minute hands. If digital readout clocks are provided, minimum size of the digits shall be 6 inches.

**103.18 AUTOMATIC OFFICIATING EQUIPMENT** —

.1 /NC/ See Section 102.16 for Automatic and Semi-Automatic Timing equipment types and performance requirements. Equipment powered directly from the utility line electrical service shall have the capability to automatically switch to stand-by battery power source in case of line power failure without affecting the continuity and accuracy of the timing system.

.2 /M/ Installation and safety: Equipment shall be installed so that it will not interfere with swimmers' start, turns, or finish and the normal overflow functions of the pool water recirculation system. All deck-level wiring shall carry no more than 12 volts.

.3 /NC/ Touch Pads: A Size and thickness: Recommended pad size shall be 6 feet 6 inches (2 meters) wide and not less than 2 feet (0.60 meters) deep. Minimum width of pads shall be 5 feet (1.52 meters). Thickness shall not exceed 3/8 of an inch (1 centimeter).

B Markings: Panel face markings shall conform and superimpose on pool end wall markings as closely as possible. Perimeter edges of the panel shall have a one-inch wide black border.

C Sensitivity: Panels shall stop the timing system instantaneously by a light hand touch anywhere on the flat surface facing the racing course and the upper edge but shall not be activated by water turbulence.

D Panels shall be installed and firmly anchored in the center of each lane and shall have no sharp edges, corners, or other protrusions on any exposed surfaces.

E At the facilities in which competition to select USA Swimming National Teams for the Olympic Games and World Championships is held, the touch pads must be minimum 0.9 meters (2 feet, 11 and 7/16 inches) high, 2.4 meters (7 feet, 10 1/2 inches) wide and maximum one centimeter (3/8 of an inch) in thickness. Such pads shall be installed at end of the course and shall extend 0.3 meters each (11 and 13/16 inches) above and 0.6 meters (1 foot, 11 5/8 inches) below the water surface. The Program Operations Vice President may waive this requirement for National Championships.

.4 Optional Accessories: Automatic officiating equipment may provide relay judging capability, automatic lap counting, split times' readouts for all lanes, correction of erroneous touch, and television equipment tie-in. Any corrections or impulses generated by the equipment operators shall be clearly identified on the results printout.

.5 Time display board (optional):

A An automatic display board visible to all swimmers shall give a digital time read-out to two decimal places, displaying split times, final times, and places for all lanes. In the event of a tie, the place shall be displayed as a tie.

B /NC/ A separate line of display for each lane meeting the above requirements shall be provided for National Championships.

**103.19 /M/ ELECTRICAL SAFETY** — All permanent or temporary electrical connections to the electronic loudspeaker start system, automatic officiating equipment, and other electrical or electronic devices operating on line voltages in the vicinity of the racing course shall be made only from a ground-fault circuit interrupter (GFI) protected convenience receptacles or circuits. In the event such receptacles or circuits are not available in the facility used for competition, portable U.L. approved self-contained type GFI outlet fittings shall be provided (furnished and installed) at the non-protected convenience receptacles by the meet management, meet director, or the equipment operator(s) whenever such equipment is connected and in use.

## **ARTICLE 104**

### **RULES FOR SWIMMING RECORDS**

#### **104.1 WORLD RECORDS**

.1 May be established only in 25 meter and 50 meter pools and shall conform to the recognized distance, stroke and other current effective governing regulations of the Federation Internationale de Natation Amateur (FINA).

G When established in a course utilizing one or more movable bulkheads for endwalls, the length of each lane must be measured in accordance with 104.2.2C(4)(c).

#### **(3) Pool Certification**

(a) Record applications will not be accepted unless certification of course length accompanies them or is on file with USA Swimming.

(b) Pool certification shall be reported on the standard form available from the Executive Director.

(c) Certification data need only be filed once unless structural changes have occurred since original certification.

#### **(4) Pool Measurement**

(a) The exact length of the course, measured by a steel tape or other acceptable measuring device in feet and inches and fractions of an inch, or in meters and centimeters, must be attested to by an accredited surveyor or engineer.

(b) A statement of the conditions under which the course was measured must be included.

(c) Where a moveable bulkhead is used, course measurement of each lane must be confirmed at the conclusion of the session during which the time was achieved.
