#### **Personal Statement**

Having served on the Athletes' Executive Committee for the past two years, I have some big ideas about how the body can become much more mission and action oriented. I want to serve on the AEC, so that I can help redefine what the Committee prioritizes, and develop effective processes for accomplishing our goals and empowering our members. I would bring to the table my consulting experience, both within our LSCs and in the professional world beyond USA Swimming to help optimize and professionalize the AEC.
